

Teen Pregnancy Prevention Program (TPP) **Fails** Most Youth

HHS research reveals that the “Evidence-Based Teen Pregnancy Prevention Program (TPP) aren't showing much evidence of effectiveness .

80%

More than 80% of students in these programs fared either **worse** or **no better** than their peers who were not in the program.

3 Programs Put Youth at **MORE Risk**

>90%

More than 90% of all federal sex education funding goes to this approach

Money Well Spent?

Nearly a \$ Billion

More than \$700 million taxpayer dollars was spent on the Teen Pregnancy Prevention Program (TPP) Since 2010

\$375 million

Taxpayer dollars spent on replicating so-called “evidence-Based” programs over 5 years

The recent research on the Federal *Teen Pregnancy Prevention Program* suggests the program is **not a good use of taxpayer dollars.**
